

Explore the Frontiers of Research

Our Service Portfolio

➤ Single-Cell Sequencing

10x Chromium

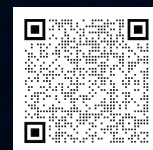

- Single-Cell 3' RNA sequencing
- Single-Nuclei RNA sequencing
- Single-Cell 5' + immune repertoire sequencing (V(D)J)
- Single-Cell ATAC-seq
- Single Cell Gene Expression Flex

➤ Spatial Transcriptomics

Product	Resolution	Sample Type
Visium CytAssist	55µm	FFPE/Frozen
Visium HD	2µm bins	FFPE/Frozen
Xenium In Situ	Subcellular	FFPE/FF
Stereo-seq V1.3	Subcellular	Frozen
Stereo-seq V1.1	Subcellular	FFPE

Certain sample types may require a risk assessment.
For more details, please contact : info@omicsempower.com.

Our Service Portfolio

➤ Yeast Library

Library Construction

- Nuclear system libraries
- Membrane system libraries

Screening Services

- Y1H/Y2H screening
- TF libraries (Rice/Arabidopsis) screening
- Ubiquitin E3 ligase screening

➤ Why Choose Us?

Rich Project Experience

Over 2000 projects spanning diverse species

Data Security

Compliant storage and transfer.

Fast Turnaround Time

Rigorous Experimental Quality Control

Our expert team ensures seamless execution from sample receipt to data delivery, with customizable workflows to match your research needs. Contact us to discuss your project or request a custom quote.
